

Emblem printing

Finishes of a new class

Der KunststoffPartner

WAREMA is your partner for all types of plastic components. With our many years of expertise we are your specialist for surface finishing. With our unique three-axle emblem printing system, you benefit from appealing, haptic design with maximum precision.

Your benefits

- / Precise printing for slender contours
- / High-grade haptics (integrated into the component) for logos, lettering and design elements
- / Clearances as low as with adhesive signage
- / Up to four paint colours in one printing run
- / Shortening of the logistics process thanks to in-house printing at WAREMA
